Scientific advances in the field of cord blood stem cells continue to appear in journals and publications. It is difficult for busy health professionals to keep up with current literature.

Educational opportunities are available upon request. Our Scientific Director, Dr. Elisabeth Semple, has been working with cord blood stem cells since the 1990's. She and other members of our team have prepared educational presentations that concisely present relevant information.

Please consider the following topics: (Check all that interest you)

- An update on the scientific advances and clinical applications of cord blood stem cells
- Public cord blood banking in Canada – advancing at glacial speeds
- Tour of the **cord blood processing laboratory** - at Toronto General Hospital
- Other presentations will be provided upon request.

Health Care professionals may request: (Check all that interest you)

- Educational Dinner for your Health Professional or group
- Grand Rounds Presentation at your clinic or hospital
- Dinner Educational Presentation and Tour
- Lunch time discussions in private or in a group setting
- Instruction for Health Professionals to optimize cord blood collection methods
